

SMS Network Coverage

Our supplier network currently provides coverage to over 500 networks in 166 countries worldwide. This document shows the networks covered and the routing groups available for sending messages to them. There are three routing groups available, (1) Economy, (2) Standard, and (3) Premium.

Routing

The following options describe the different routing groups and a description of the service available.

- Economy (Routing group 1)**
 This route will usually incur delays. We suggest you test this route before sending to determine if the delay is acceptable. This route is appropriate for messaging that is price sensitive or where delays are not important. Available on all networks.
- Standard (Routing group 2)**
 There will occasionally be delays on this route. This route is appropriate for most messaging needs. Available on most networks.
- All UK Premium (Routing group 3)**
 There should be no significant delays on this route. This route should be used for medium and high value messages and for paid for content. Only available to the UK, Australia, Austria, Belgium, Germany, Ireland, Italy, Netherlands, Spain, Sweden and Switzerland.

Network Coverage

The 'Rating' is an indication of the quality of the highest routing group available to that network. It is an empirical measure and is in terms of the reliability and functionality of the routing group, (with 1 being the lowest and 5 being the highest).
